Reverse swivelling	2,4	2,4	2,4	2,4	2,4
Patented compensation system					

ENGINE	Iveco NEF 74 Kw	Iveco NEF 93 Kw
Model:	Iveco NEF	Iveco NEF
Maximum power kW (hp):	74 (101)	93 (127)
Revolutions per minute (rpm):	2200	2200
Operation:	4 stroke diesel	
Injection:	Direct mechanical	
Number and arrangement of cylinders:	4, vertical in line	
Engine size (cm3):	4485	4485
Specific consumption at 2200 rpm (g/kWh):	230	230
Aftercooler Turbo compressor		
Liquid cooling system		

HYDRAULIC PLANT	
Gear pump with capacity at max. speed (lt/1'):	110
Max operational pressure (bar):	230
Distributor control with joystick:	3 in 1

DIFFERENTIAL AXLES	
Steering axles: 2, with planetary reduction gears	
Steering types: 4 wheels / transversal / 2 wheels	
Front axle: rigid	
Back axle: oscillating	
Oil bath service braking on the front axle with servo brake	
Negative action parking brake.	

REFUELLING (Litres)	
Hydraulic plant (total)	140
Fuel tank	95

OPTIONALS AND ACCESSORIES
A/C; Webasto Heater; Digital speedometer; Water Heater; Driver's seat with pneumatic suspension; Light on boom head; Quick coupling for accessories; Radio; Anti-theft system; Glass protection.
(For additional customizations, contact the area dealer)

TRANSMISSION
Hydrostatic transmission with variable displacement pump.
Hydrostatic engine with automatic variation.
Electrical - hydraulic inversion.
Inching pedal for controlled advancement.
Servocontrolled 2-speed gearbox.

DEVICES AS PER STANDARD
Anti-tipping device with pejorative movement block.
Hydraulic socket for any accessories on the boom head.
Soundproof closed cab, ROPS-FOPS approved, with heater.
Self-blocking front axle differential (limited slip 45%).
Electric window winder.
Only on the following models: 33.11
Independent hydraulic tipping outriggers

TYRES	
Tyres	405/70x20"
Alternative	405/70x24"

Accessories and Attachments specific for any need

Bucket with teeth

Bucket for light materials

Mixing bucket

Jib crane extension

Ladle

Winch

Swan neck jib

Materials basket

Orange-peel grab

This is only a part of the many accessories and various equipment available for Dieci machines.
For information about the entire range of accessories **CONTACT US** using contact information contained on the rear of the document.

360° Visibility

From the significantly raised driver's seat, the innovative anti-fall protection system, located inside the cab, allows for a 360° view that is without comparison.

Two independent rear-view mirrors on both sides reduce blind spots to a minimum.

Comfort

A telescopic lift that takes care of everything... You will notice it immediately, equipped with the largest door on the market, accessing the driver's seat will no longer be a problem. The inside of the cab has been entirely designed in order to make work easier for the operator. Thanks to the integration of the armrest in the right instrument panel, it both reduces arm stress and provides greater accessibility to the joystick. The precise distribution of the ventilation grills optimises efficiency of the heating and air conditioning system, providing a perfect distribution of air inside of the cab.

Engine: low consumption, high yield

Designed for intense use, they guarantee a high level of reliability over time.

The new TIER III engines guarantee remarkable elasticity providing maximum power, even at low engine speed and an unparalleled low operational noise level.

This, along with the possibility of equipping the machine with a particle filter, provides for drastic reduction of consumption.

Safety

For us, safety is an absolute priority, it is guaranteed by an electronic system, standard on all models, which makes it possible to always keep the weight on the forks or on equipment under control during work manoeuvres.

The load limiter flexibly and accurately manages both standard equipment and that used for specific applications.

Design

Dieci has always considered design a significant aspect when engineering their own products.

This philosophy is evident when considering the newly designed cab and chassis restyling.

Paying particular attention, Dieci engineers have been able to interpret the request of a comfortable and functional compartment, creating a spacious and ergonomic cab with snappy styling.

Great agility and reduced steering radius

One of the characteristics that distinguish Dieci telescopic devices the most is workability. The extremely reduced steering radius combined with high capacity axles make the machine both agile and powerful. The four drive wheels and the possibility of steering the wheels in three different modes, make it possible to operate on any type of land. Muddy ground, mountain areas, tight spaces and many other extreme conditions will no longer be an obstacle.
